

PROJECT PROFILE

Showroom Kitchen

Project Type: New Construction
Location: Minnetonka, Minnesota

The goal was to create a kitchen that would stand out among the many in the showroom, with a unique design that evoked a sense of place far removed from its actual suburban setting.

Working within a prescribed footprint and using appliances and other elements provided by the showroom, our Studio sought to design a compelling, inviting kitchen that provided all of the comforts and conveniences of a true residential setting – upon entering the space, visitors should feel immediately at home.

Timeless design elements, including an Arts & Crafts stencil and light fixtures designed by our Studio, call to mind kitchens of the 1920s and 1930s, and demonstrate our ability to further the established aesthetic of historic homes.

Our Studio designed the cabinetry handmade tile in bold, contrasting colors, also enhance the aesthetic, and was responsible for all elements of interior design and architecture for the project, right down to the selection of the dishes.
