

PROJECT PROFILE

Goodrich Avenue Victorian

Project Type: Addition & Remodel

Location: Saint Paul, Minnesota

A whole-house renovation project, with an addition, returned this Crocus Hill residence to its original splendor while providing subtle 21st-century updates to the design and amenities. Respecting the history of this 1880s residence was paramount, but the homeowners also desired a thoroughly modern kitchen, one with all of the conveniences of modern life. The solution pairs classic design, including vertical grain fir cabinetry designed by our Studio and painted wood, along with new, highly functional appliances.

Throughout the space, one can find subtle details echoing the history of the house, including period light fixtures (also designed by our Studio) and an ornate tile backsplash.
