Project Type: Kitchen Remodel
Location: Minneapolis, Minnesota

This historic Prairie School gem retained much of its original character, except in the kitchen, which had been remodeled in the 1970s. The homeowners sought to return the original aesthetic to the space while updating it with modern amenities and increased function, all within the original footprint of the residence.

New cabinetry, designed by our Studio, furthers the Prairie School aesthetic while including such subtle flourishes as a hidden appliance 'garage,' a decorative cut-out hiding the radiator below the sink, and a built-in drop-front desk. A new layout to the space keeps the traffic flow out of the work area and allows for more counter area. Custom light fixtures, designed by our Studio, enliven both the kitchen and the adjacent breakfast room area.
