

PROJECT PROFILE

Linwood Park Area Residence

Project Type: Addition & Remodel

Location: Saint Paul, Minnesota

Our Studio remodeled the whole house for this busy family of seven. The program was for more space for the five kids, and included six new bathrooms and a large addition that includes the kitchen, breakfast room and a small family room area. It was important to the family that this space be a convenient, informal gathering area; to this end, there is a sense of openness between the rooms, and the kitchen features multiple work stations to allow the kids to help with or observe the cooking process.

The family wanted a light-filled kitchen with a historic aesthetic in keeping with the rest of the house, along with modern amenities to suit the needs of their busy lives. Keys to the design include maple cabinetry (whose tones help establish the light, warm feel of the space) and a pass-through to the breakfast room.
