

#### PROJECT PROFILE

### Wirth Parkway Craftsman

Project Type: Kitchen Remodel  
Location: Minneapolis, Minnesota

This 1920s residence, with a postcard-perfect view of Wirth Parkway, is a case study in a small-scale project done right. The homeowner didn't have a grand budget, but also didn't want to skimp on the details and function. She served as her own general contractor and got very involved in the design process, which helped keep costs down.

The layout of the kitchen stayed essentially the same, with window openings left where they were. New cabinetry designed by our Studio furthers the Craftsman aesthetic while breathing new life into the space. A new sink and appliances bring the kitchen up to date for modern living.
